About the Researcher

Applied Survey Research (ASR) is a social research firm dedicated to helping people build better communities by creating meaningful evaluative and assessment data, facilitating information-based planning, and developing custom strategies. ASR has nearly 40 years of experience working with public and private agencies, health and human service organizations, city and county offices, school districts, institutions of higher learning, and charitable foundations. Through community assessments, program evaluations, and related studies, ASR provides the information that communities need for effective strategic planning and community interventions.

Introduction

The Human Care Alliance (HCA) sought to learn about the impact of wages in the Santa Cruz County nonprofit sector. They hoped to better understand the sector and identify impacts of the minimum wage mandate in order to explore and craft promising solutions. HCA contracted with Applied Survey Research (ASR) to co-design two surveys using best practices and to conduct the surveys according to a methodology that captured the voices of both employees in the nonprofit sector and agency leadership. The two online surveys were completed by 221 nonprofit employees and 30 nonprofit agency leaders.

Approach

HCA leadership and Applied Survey Research (ASR) worked together to create two surveys: one administered to employees of Human Care Alliance member agencies and other local non-profits, and one administered to the leadership of local non-profit agencies. After survey pilot testing by ASR, HCA invited leaders in 103 local nonprofit agencies and nonprofit childcare centers to complete the agency survey. Those leaders were asked to have their employees complete the employee survey.

Thirty agency leaders and 221 nonprofit employees (responses from the leadership survey indicated a potential for 1,037 employees at the 30 agencies) completed the two online survey questionnaires. Data were then sent to ASR, who processed the data and calculated overall frequencies and percentages. Additionally, two cross tabulations of the employee data were calculated: Selected results by agency sector and selected results by type of employee (exempt or non-exempt). These cross tabulations are indicated in the report with the following icons:

**AGENCY SECTOR CROSS-TABULATION RESULTS**

**EMPLOYEE TYPE (EXEMPT/NON-EXEMPT) CROSS-TABULATION RESULTS**

Qualitative employee data were coded and included in the report. Data in the report underwent extensive proofing to ensure accuracy. The data proofing protocol is a multi-step process that thoroughly checks text, numbers, and formatting in the narrative, tables, and charts.
Findings

NONPROFIT LEADERSHIP SURVEY RESULTS

AGENCY CHARACTERISTICS

Surveyed agencies represent a wide variety of nonprofit sectors.

- Senior Services: 20%
- Other*: 17%
- Multi-Service/Umbrella Agency: 17%
- Health/Behavioral Health: 17%
- Youth: 10%
- Services Providing Basic Needs**: 7%
- Family Services: 7%
- Housing/Homeless: 3%
- Childcare: 3%

*Other includes: Legal, justice, and conflict resolution services and disability services.
**Types of basic-needs agencies: Food, employment and transportation.

Of the 30 agencies surveyed, just over half (53%) have 20 or fewer employees.

Agency n: 30.
More than three quarters (80%) of surveyed agencies have a budget size of less than $3m.

The majority (83%) of surveyed agencies receive funding from the County of Santa Cruz. In addition to funding from city jurisdictions, the Community Foundation of Santa Cruz County funds over half (60%) of surveyed agencies.

Agency n: 30 respondents offering 120 responses.

Note: Multiple response question. Percentages may not add up to 100.
Surveyed agencies reported most of their general operations revenue coming from federal funding (29%) and state funding (23%).

- Federal Funding: 29%
- State funding: 23%
- Local funding (including CORE): 19%
- Donations: 19%
- Fees for services: 19%
- Grants: 18%
- Other: 10%
- Endowment: 6%

*Other includes: Events, corporate and business donation/sponsorships, and private insurance.

Note: Multiple response question. Percentages may not add up to 100.

One quarter (25%) of agency respondents reported not offering any annual wage increases, and half (50%) reported offering a cost of living adjustment.

- Bargaining Increase: 4%
- Both: 4%
- None: 25%
- Other: 39%
- Cost of Living Adjustment: 50%

*Agency n: 28 respondents offering 34 responses.

Note: Multiple response question. Percentages may not add up to 100.
Agencies surveyed reported spending most annually on health insurance with employee cost share and employer paid worker health insurance premiums.

Note: Amounts are an average across responding agencies.

**IMPACT OF LOW WAGES**

The vast majority (91%) of agencies surveyed are impacted by low wages within the nonprofit sector.

Agency n: 22.

“A great staff member resigned due to not being able to find suitable housing that they could afford. It took several months to hire a replacement and the program suffered and many program participants left the program.” – Nonprofit Agency Leader
Virtually all (91%) of agencies surveyed reported that they struggle to recruit qualified employees.

Agency n: 22.

Burnout, staff loss due to relocation, and losing employees to better paying jobs were named by 85% of surveyed agencies as impacts of low wages. Three quarters of agencies reported that their clients are impacted by staff turnover.

- We are experiencing burnout at all levels of our organization. 85%
- We are losing employees due to relocation when they can no longer afford to live here. 85%
- We are losing skilled employees to better paying jobs. 85%
- Programs are impacted by vacancies while we search for and hire suitable candidates. 80%
- Clients are impacted by staff turnover. 75%
- Employees must work second job(s) to cover their basic living expenses. 65%
- We must hire employees with lower skills sets. 65%
- We are experiencing increased costs for training. 45%
- Other 10%
- Our organization is not impacted. 0%

Agency n: 20 respondents offering 119 responses.
Note: Multiple response question. Percentages may not add up to 100.

"We are losing two excellent staff members this year due to their inability to afford to live in this region. Both were trained extensively and will be difficult to replace."
- Nonprofit Agency Leader
IMPACT OF MINIMUM WAGE INCREASE

One half (50%) of surveyed agencies report being prepared for the 2021, $30 exempt staff wage increase while 69% report being prepared for the $15 minimum wage increase.

According to figures reported by surveyed agency leaders, it would add nearly $45k annually to agency budgets to meet the $30/hour exempt increase by 2021, and nearly $14k annually for the $15/hour minimum wage increase.

What would it add to your nonprofit agency's annual budget to pay:

- Exempt employees at or above $30 per hour ($62,400 per year)? $44,349.88
- Non-exempt employees at or above $15 per hour? $13,488.15

Note: Amounts are an average across responding agencies.

A large majority (70%) of agency leaders plan to look for other funding as a strategy to address the wage increases. More than a third (39%) plan to change or reduce staffing, and slightly less than a quarter (22%) plan to reduce services.

Agency n: 23 respondents offering 40 responses.
Findings

According to surveyed agency leaders their level of funding remained the same through the minimum wage mandate, over half (58%) of agencies surveyed would need to make a reduction in SERVICES.

Eighty-five percent of agencies surveyed would need to make a 10-30% reduction in SERVICES if their level of funding remained the same through the minimum wage mandate.

Agency n: 13.

If their level of funding remained the same through the minimum wage mandate, 46% of agencies surveyed would need to make a reduction in their FTE COUNT.

Note: Multiple response question. Percentages may not add up to 100.
*Other includes limiting expansion and utilizing volunteers.
Forty-five percent of agencies surveyed would need to make a 5-10% FTE COUNT reduction if their level of funding remained the same through the minimum wage mandate.

Agency n: 11
NONPROFIT EMPLOYEE SURVEY RESULTS

TYPE OF AGENCY

Most (57%) nonprofit employee respondents work in the multi-service/umbrella agency, health/behavioral health, or senior services sectors.

- Multi-Service or Umbrella Agency: 22%
- Health/Behavioral Health: 19%
- Senior Services: 16%
- Family Services: 11%
- Youth Services: 8%
- Childcare: 7%
- Housing/Homeless: 5%
- Other Basic Needs (Food, Employment, Transportation): 3%
- Other*: 9%

Nonprofit employee n: 214.
*Other includes: Disability, legal, substance use, student, and LGBTQ+ services.

LEVEL OF EDUCATION AND TRAINING

The majority (71%) of nonprofit employees surveyed received an Associate’s degree or higher.

- Bachelor’s degree: 39%
- Master’s degree: 16%
- Associate’s degree: 16%
- Some college credit, no degree: 15%
- Professional degree: 4%
- High school graduate/Equivalent: 4%
- Trade/technical/vocational training: 3%
- Some high school, no diploma: 2%
- Elementary school to 8th grade: 1%

Nonprofit employee n: 214.
Over half (52%) of all nonprofit employees indicated that their job requires a specific credential, license, or permit to perform.

Nonprofit employee n: 214.

**HOUSING**

Nearly one in five nonprofit employees surveyed reported living with another family.

Nonprofit employee n: 214.

**EMPLOYMENT STATUS AND SUSTAINABLE WAGES**

Nearly one-quarter (24%) of nonprofit employees surveyed are exempt, or salaried.

Note: Other responses include: Fair compensation makes me feel good/valued, when I am paid well I have pride and feel valued, I work harder when I am paid well (5%), and I am actively looking for other work (3%).
Conclusion

Nonprofit employee respondents in Santa Cruz County report that they are having to make difficult quality of life decisions. High housing costs and low wages make it difficult for nonprofit employee respondents to pay bills and rent, save for the future, and/or afford basic needs. Eighty percent of surveyed hourly wage earners spend 50% or more on housing costs per month. Nearly half of surveyed employees had to access public benefits in order to meet their basic needs. Fifty-five percent went without one or more basic needs in the past 12 months. Sixty-two percent have to work a second job in order to support themselves and/or their family.

Ninety-one percent of agencies surveyed reported that they are impacted by low wages in the nonprofit sector and struggle to recruit qualified staff. Half of the surveyed agencies reported being prepared for the $30 exempt staff wage increase, and 69% reported being prepared for the $15 minimum wage increase. A large majority (70%) of these agencies said that their solution was to look for additional revenue. Below is the approximate county-wide impact of the needed revenue increase to meet wage increases, based on the average impact to surveyed nonprofit agencies:

- 103 agencies X $44,000 average agency budget increase = $4,532,000 county-wide revenue increase necessary to meet the need for the $30/hour exempt staff wage increase.
- 103 agencies X $13,000 average agency budget increase = $1,339,000 county-wide revenue increase necessary to meet the need for the $15/hour minimum wage increase for hourly employees.
- Upwards of $5,871,000 in additional revenue could be needed to address the two wage increases required for nonprofit agencies in the county.

Other solutions included reducing services and staff, and reclassifying exempt staff to hourly status. Over half (58%) of agencies reported that they will have to reduce services if their funding level remains the same, and 46% will have to reduce FTE count without additional revenue.

In short, surveyed nonprofits in Santa Cruz County report that at the current wage structure they are already having difficulty recruiting and retaining quality staff. Without additional revenue, surveyed agencies will be forced to reduce staff and/or services to accommodate the additional costs associated with the two wage increases in 2021.
